

Is THIS the Entire Point of the National Popular Vote scheme?! 'HALF of the country won't matter once we activate this election scheme!?!'

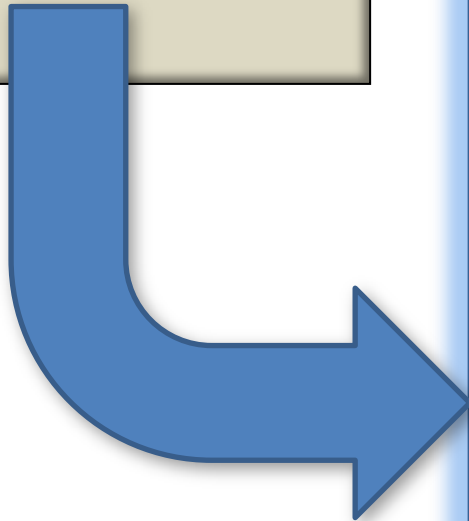

(paraphrased)

From the NPV Marketing Team's
OWN online documentation!

Published March 28, 2019

"Electoral Votes Not Needed"

To motivate their own people and some gullible State lawmakers about how CLOSE they actually are to pulling off this Contract of COLLUSION scheme, the NPV lobbyists point out that **their scheme DOES NOT NEED 268 Electoral Votes worth of States OR Americans**, because once they get their 270 Colluding Votes signed on, 'the Left side of our Chart here is the 268 votes that the Compact doesn't need, **since they won't matter once the 270 votes on the right side of our chart are secured.**'

National Popular Vote Compact: 2/3 of the way to enactment

version of March 2019

Updated progress pie charts! Now with both CO and DE added.

This chart shows the entire electoral college. The right half is the 270 votes that the Compact needs signed on in order to go into force. The left side is the 268 votes that the Compact doesn't need, since they won't matter once the 270 votes on the right are secured 😊

This graphic is correct!! Whether they had admitted it or not, the NPV Compact scheme renders as completely INOPERATIVE. The Article 4 Guarantee of a republican form of government to EVERY State, which includes the individual State actions they take under Article 2 to decide the best Manner for their State in which to choose the State's Electors, will actually MEAN nothing to the majority of States which will NOT join this NPV scheme!
